

Erlenmeyer Flask Systems

The number one choice of the biopharmaceutical industry in single-use Erlenmeyer Flask assemblies, Bio-Simplex[™] Erlenmeyer Flask Closures are now available solo (Closure Assembly) or with a standard polycarbonate flask (System). Our Bio-Simplex[™] Closure Assembly features the EZ Top[®] assembly, made from pharmaceutical grade C-Flex[®] thermoplastic elastomer (TPE) resin and tubing, and is engineered to ensure an unobstructed fluid path, extremely low levels of extractables and a secure elastomeric seal against plastic, glass and metal surfaces. The Closure Assembly includes C-Flex[®] tubing with a choice of either male Luer connections or CPC[®] quick disconnect fittings, a Bio-Simplex[™] FlexJoint[™], 0.2 µm vent filter and polypropylene cap. Economically designed for the single use market, both the Bio-Simplex[™] Assembly and System eliminate cleaning and contamination from repeated use. They are easily used with sterile connecting devices and thermal tubing sealers. We offer standard 2 port configurations in 1, 2 and 3 Liter sizes, available as individually packaged Bio-Simplex[™] Closure Assemblies or a complete packaged Bio-Simplex[™] Erlenmeyer Flask System (Bio-Simplex[™] Assembly, Erlenmeyer Flask and cap). Both come gamma irradiated.

Customer-generated designs, sizes, packaging and other options — such as connectors, heat-sealed ends or alternate materials — are available as custom orders.

Bio-Simplex[™] Erlenmeyer Flask Systems feature the Closure Assembly, flask and cap.

	BIO-SIMPLEX [™] ERLENMEYER FLASK CLOSURE ASSEMBLY (NO FLASK)		BIO-SIMPLEX [™] ERLENMEYER FLASK SYSTEM INCLUDING FLASK
EMF SIZE	w/Luer Connection	w/ CPC quick disconnection	w/Luer Connect
